

# RAMSEY MODEL KX-200 R FRONT-END WINCH

For 4-Wheel Drive Jeep Truck and 4-Wheel Drive Jeep Station Wagon

Drum accommodates 150 ft. of 5/16" line with ample working room.

WINCH SPECIFICATIONS:  
Safe Working Load ..... 6,000 lbs.  
Gear Ratio ..... 50 to 1  
Weight of Winch only ..... 60 lbs.

Drive shaft does not interfere with steering gear.

Universal joint

Exhaust pipe is bent outward at this point to clear drive shaft.

Center support bearing prevents drive shaft from "whipping" at certain speeds.

Universal joint

Power take-off with chain drive case attached, is easily installed in the usual manner.

Chain drive case and power take-off are shipped as a complete unit. Chain case runs in oil which assures long sprocket and chain life, plus trouble-free service.

Shaft extends from back of chain drive case for driving other units on rear of vehicle.
